Refreshing energy*

Will make your skin much cleaner and whiter.

Aqua Therapy System

Hydro Queen™

- Removal of horny substances and supply of moisture at the same time*
- Safety: neither downtime nor side-effects*
- Multiple skincare effects*

All the more clean and bright with refreshing energe
in our skin and scalp!!!

Hydro Queen™ is ...

not a decortication old style machine. It is a new-concept natural spa skincare system, which makes your skin exfoliation with no pain. Also, a range of treatment is variety such as cleansing of skin and removal of obsolescent horny substances. If you use Laser Doctor as a helper, it makes your skin nutritious, calm and Epidermal Grwoth Factor (EGF). After all the treatment, you will feel moist and refreshing. Ultra Sound can release pain, tighten pores and treat for fat.

Hydro Queen™ Name and function of parts and components

Hydro Queen™ is designed to promote exfoliation to remove aged dead skin cells, sebum and hydrate your skin. Laser Doctor as a helper makes your skin nutritious, calm and Epidermal Growth Factor (EGF).

Because treatment does not cause any damage to skin and scalp, patients can lead a normal life right after treatment. There are no side effects such as injuries, pain, burns, rashes, etc.

Treatment removes foreign materials (such as cosmetics and sebum) so users can expect to achieve whitening and pore-tightening effects.

User Manual for Hydro Queen™

Hydro Queen™ adopts a vacuum extrusion method. The hand piece should come into close **contact with the skin. You can control pressure for both fine bubbles and serum liquid to perform** treatment. Red areas on the skin that may be created during operation will disappear normally in 20~30 minutes and the skin restores healthy and lustrous condition.

01	Cleansing	Wipe wastes 2~3 times off the surface of the face with a cleansing cream
02	Diagnosis of skin and Selection of serum	Identify whether the skin is normal, oily, sensitive, or of acne type and make selection of a serum suitable for the skin type. [Aqua PE:For all skin type]
03	Treatment [removal of keratin and sebum]	First spread the selected fine bubble and serum over the face and then divide the face into 3~5 areas to start treatment for about 2 minutes.
04	Washing	Wash and wipe out the face cleanly with a spongy after treatment.
05	Treatment (supply of moisture **and nutrients)and finish**	Perform treatment while letting serum penetrate into the skin; after treatment, give a finishing touch with a skin balm or a nourishing cream.

1. Neck: after turning face a little sideway, make lymph nodes relax by massaging the area from top to bottom and in the opposite way with the sternocleidomastoid region in the center.
2. Nose: perform treatments repeatedly because there is lots of sebum in this region.
3. Perform treatment by traveling all across the face from bottom to top along the texture of muscles.
4. Treatment is recommended to be made for about 2 minutes respectively in the order of the neck → chin → cheek → forehead → nose.

Special tips

For removal of keratin as well as for extrusion

Whole face

Around the nose

The special tip of the Hydro Queen™ consists of two suction holes and one serum sidcharge hole.
Its specially-designed spiral tip is intended to hold a product long enough to soften dead cells of skin, provide nutrients, and absorb them in a vacuum state to maximize its peeling and extrusion effects.

Hydroqueen Solution

Aqua PE

Laser doctor (Serum)

RF Cream for lifting and Slimming
